

# The monthly European Industrial Pharmacists' newsletter

APRIL 2025

## Legislation

### The proposal of a Critical Medicines Act

The proposed Critical Medicines Act aims to strengthen the EU's supply security of essential medicines by addressing manufacturing dependencies, boosting strategic projects, enhancing transparency, and fostering international partnerships.

## Regulatory

### The Clean Industrial Deal and the Omnibus package on simplification

The Clean Industrial Deal promotes EU decarbonisation and reindustrialisation, focusing on clean-tech and energy-intensive sectors. The Omnibus Package simplifies procedures and supports affordable energy and sustainable finance.

## Biotech

### The EU's Competitiveness Compass and the new EU Biotech Hub

The EU's Competitiveness Compass 2025 sets a roadmap for innovation, green growth, and economic security. It launches a new Biotech Hub, a Competitiveness Fund, and streamlines rules to boost biotech, AI, and Europe's global competitiveness.

## AI / Legislation

### The EU AI Act: compliance obligations and business opportunities in 2025

The EU AI Act, in force from February 2025, sets risk-based rules for AI use. High-risk systems face strict requirements, while banned practices and fines highlight the need for compliance and ethical innovation.

## AI

### Magazine MakingLife

### The AI in Pharma Sector

As AI transforms pharma, cybersecurity safeguards data and compliance. The digital shift also redefines HR, demanding new skills and agile leadership. In this fast-evolving sector, technology and people must grow together for a secure and sustainable future.

## Training

### Annex 1 | Chapters & Topics

### Training Course

On-demand training on EU GMP Annex 1: 8 modules on the requirements of the new guideline.

A reserved discount is available for EIPG members.
