JUNE 2025

Business & Policies

EU Life Sciences Strategy

The European Commission is drafting a new Life Sciences Strategy for 2025–2029. In its response to the call for evidence, EIPG emphasizes the need for regulatory alignment, innovation incentives, and active involvement of all stakeholders across the pharmaceutical and healthcare value chain.

Regulatory Affairs

EMA guideline on investigational ATMPs

EMA's new guideline for investigational Advanced Therapy Medicinal Products (ATMPs) defines quality, non-clinical, and clinical data requirements, encouraging a risk-based, multidisciplinary approach to ensure safety and trial efficiency.

Technology & Research

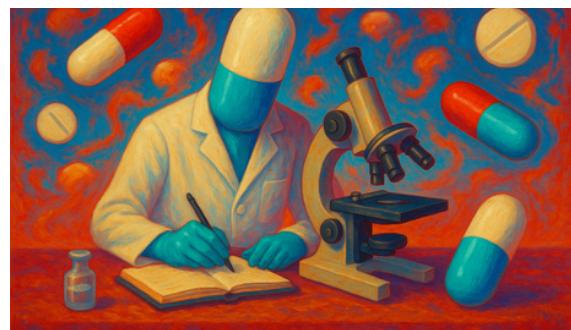

New Approach Methodologies, the EMA's horizon scanning report

EMA's horizon scanning report on New Approach Methodologies (NAMs) highlights emerging tools and technologies aimed at reducing animal testing, accelerating drug development, and supporting regulatory innovation.

Technology & Research

Current status and perspectives in Joint Clinical Assessment

The EIPG examines the current status and future outlook of JCA, highlighting progress in EU collaboration, challenges in aligning methodologies, and the potential for streamlined assessments. Recommendations include stakeholder engagement, enhanced data sharing and regulatory harmonization.

Magazine MakingLife

AFI Symposium

This issue explores key themes at the heart of the 64th AFI Symposium: AI and precision medicine, sustainability and reshoring, regulatory frameworks, and real-world data. A convergence of perspectives from managers, clinicians, and researchers aiming to anticipate the future of the pharmaceutical landscape in Italy and Europe.

Training

Annex 1 | Chapters & Topics

Training Course

On-demand training on EU GMP Annex 1: 8 modules on the requirements of the new guideline. You can attend the full course or individual modules..
